Objective

The objective of Vanguard Funds plc (the "Company") as set out in its constitutional document is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public and operated on the principle of risk-spreading in accordance with Undertakings for Collective Investment in Transferable Securities Regulations 2011 (as amended) (the "UCITS Regulations").

Performance summary, tracking difference and tracking error

The performance of the Funds during the financial year under review is as set out below:

Further information on these performance measures and calculation methodologies used is detailed below:

Fund returns disclosed are the performance returns for the primary share class for each Fund with dividends reinvested, net of fees and expenses charged directly within the relevant share class, which has been selected as a representative share class. The returns disclosed for the benchmark are in the same currency as the primary share class, unless otherwise stated. The return of the primary share class disclosed may differ to the aggregate Fund performance for all share classes as reported in the financial statements primarily due to the impact of foreign currency translation and share class specific expenses. Performance returns for any other share class can be made available on request.

For Funds that commenced trading and/or fully redeemed during the financial year, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed.

Tracking error measures the volatility of the return difference between each Fund and its relevant index. It is calculated as the standard deviation of the tracking difference between the Fund and the index (gross of fees for the trailing 36-month period, or since the Fund’s inception if it does not have 36 months of performance history).

Realised tracking error may vary from the anticipated tracking error, depending on a range of circumstances. These include transaction costs, securities lending income and withholding tax differences. The anticipated tracking error and realised tracking error are not expected to vary significantly under normal circumstances. The Realised Tracking Error excludes adjustments for swing pricing. The tracking error disclosed for each Fund is based on an accumulation share class that is in the same currency as the Fund's base currency.

[6] Since inception returns: 9 December 2025.

[7] Since inception returns: 4 November 2025.

[a] The Fund was launched on 19 May 2026. Due to the insufficient performance history, a statistically meaningful tracking error cannot yet be calculated.

[b] The difference in tracking error is due to the Fund's accrual of capital gains tax for India and Brazil which are not included in the benchmark. In addition, the Fund divested its Russian holdings that had previously been valued at zero and were not part of the benchmark.

Performance Summary

Q3 2025

- As some global uncertainties faded in the third quarter, major economies continued to diverge. US economic activity improved, while it softened in the euro area and the UK. Inflation remained at target levels in the euro area but was elevated in the United Kingdom and United States.
- In equities, the UK recorded healthy returns, helped by a resilient global economy, easing trade tensions and a weaker sterling boosting FTSE 100 company earnings. However, emerging markets led global equity gains overall, driven by progress in trade talks, rising precious metal prices and a softer US dollar. US stocks also posted robust returns, outperforming other developed markets, buoyed by strong corporate earnings and renewed enthusiasm for AI. European equities made solid gains but lagged other major markets. Japanese equities advanced strongly, supported by continued momentum in corporate structural reforms and US interest rate cuts.
- In bond markets, investors set aside concerns over economic growth, inflation and geopolitical risks. US Treasury yields initially rose on inflation worries but later reversed course after the US Federal Reserve (Fed) cut rates in September, as its attention shifted to supporting the labour market. Meanwhile, Euro region bond yields climbed amid a more optimistic economic outlook, helped by easing trade tensions and the prospect of higher German government spending. UK yields also moved higher, with stubborn inflation and fiscal concerns pushing the 30-year gilt yield to a record high. Moreover, persistently high inflation dampened expectations of an interest rate cut in 2025. In Japan, political pressure to raise public spending weighed on government bonds. Lastly, credit markets performed well, particularly US investment grade bonds, where spreads tightened on the back of solid corporate earnings.

Q4 2025

- Global economic activity strengthened in Q4, supported by easing trade tensions, reduced economic uncertainty and a surge in US AI-related investment. Inflation remained elevated in major economies, notably the US and UK. Central bank policy diverged, as the European Central Bank (ECB) held rates steady, while the US Federal Reserve (Fed) and Bank of England (BoE) both continued to cut.
- Global equities ended 2025 on a buoyant note, with risk-on sentiment dominating the final quarter as inflationary pressures eased and interest rates were cut with more expected in 2026. The UK delivered healthy gains, supported by banks—which benefitted from a base rate cut, healthy balance sheets and solid earnings—as well as by pharmaceutical and mining companies, the latter boosted by strong commodity prices. Europe (ex-UK) equities delivered one of the strongest gains in Q4, helped by easier financial conditions and robust performance from energy, financial and utility companies. Emerging market equities rose, led by Korea, Taiwan and several commodity-linked markets, while China lagged amid continued stress in its property sector. US equities advanced but lagged other major stock markets as market leadership broadened and the focus shifted away from AI-led companies. Japan posted strong local-currency gains despite the Bank of Japan's rate hike, as technology and construction firms outperformed. Yen weakness, however, pared returns in sterling terms.
- In fixed income markets, global government bond performance diverged in late 2025. UK government bonds stood out as the top performer, with sentiment improving following the UK government's Budget in November and the Bank of England's December cut in rates. US Treasuries delivered muted returns as the yield curve steepened. The US Federal Reserve cut rates twice during the quarter, citing labour-market concerns. Japanese government bonds sold off sharply as yields climbed amid continued policy normalisation and fiscal stimulus. Elsewhere, performance of euro area bonds was mixed. The European Central Bank kept rates on hold and upgraded its outlook for both growth and inflation. While German bonds sold off as yields rose, some other euro area bond markets outperformed. Lastly, investment-grade credit delivered solid returns as spreads narrowed, with UK investment-grade credit outperforming.

Q1 2026

- 2026 started with rising geopolitical tensions, shifting trade policy and growing unease about AI's impact on businesses. Global economic activity remained weak as uncertainty weighed on growth. Inflation continued to ease in the UK and the US, although the inflationary effects of the Middle East conflict had yet to appear in official data during the period. Consequently, central banks adopted a cautious tone, with the European Central Bank (ECB), the Bank of England (BoE) and the US Federal Reserve (Fed) all signalling a wait-and-see approach at their March meetings.
- Global equity markets were mixed over the quarter. UK equities delivered positive returns, supported by relatively high exposure to commodity linked sectors, particularly energy. By contrast, US equities posted negative returns, underperforming most other major stock markets. Higher oil prices and concerns about AI's impact on traditional business models weighed on sentiment. European equities (ex UK) also recorded weak performance amid ongoing geopolitical risks. Elsewhere, Japan equities posted a healthy gain, driven by expectations of political stability and pro growth policies, despite some pullback in March from Middle East tensions. Overall, emerging market equities were broadly flat in local currency terms but generated a modest gain in sterling terms. Within the region, Korea and Taiwan gained on robust AI related demand, while China and India lagged as higher oil prices weighed on their energy dependent economies.
- Fixed income markets sold off over the quarter, as government bonds came under pressure on increased uncertainty around the future path of interest rates given concerns that surging energy prices will reignite inflation. UK index linked gilts were the exception, posting positive returns. US Treasuries also proved relatively resilient, delivering broadly flat returns and outperforming most other major bond markets. By contrast, UK government bonds delivered the weakest returns among major government bond markets as expectations for Bank of England rate cuts were scaled back, following its more hawkish tone. Euro area government bonds were also weaker after the ECB kept policy rates unchanged, while Japan government bonds sold off amid expectations of higher government spending and the Bank of Japan signalling rising inflation pressures. Elsewhere, non-government bond sectors lagged.

Q2 2026

- Two contrasting forces shaped the global economy and financial markets during the second quarter: the energy shock caused by the Iran war and optimism surrounding artificial intelligence (AI). Global shares significantly outperformed bonds, with US and emerging market shares leading the gains. Rising investment in AI-related infrastructure and expectations of stronger company earnings supported share prices. In contrast, bond returns were weaker as investors feared the Iran war could drive up inflation, raising the prospect that interest rates would remain higher for longer.
- Global stock markets rose over the quarter as the outlook for company earnings improved. US shares made significant gains, with enthusiasm around AI supporting financial and industrial companies. While UK shares rose, they gained less than other markets because the UK market has more companies in weaker commodity-linked sectors and fewer companies in fast-growing areas such as technology. Europe (ex-UK) shares also rose as Middle East tensions eased, and manufacturing activity strengthened. Emerging market shares made the strongest gains, led by Korea and Taiwan, although Chinese shares were held back by weaker consumer spending and challenges in parts of the automotive sector. Japanese shares rose, helped by a weaker yen.
- Bond markets were mixed over the quarter. UK government bonds benefitted from lower inflation, which reduced expectations of an interest rate rise from the Bank of England in the near term. US government bonds were relatively flat as the Federal Reserve, the US central bank, indicated that rates may need to stay higher for longer despite inflationary pressures easing. In the euro area, government bonds rose as the inflation outlook improved. In contrast, Japanese government bonds fell as comments from Bank of Japan officials reinforced expectations that interest rates could rise further. Lastly, corporate bonds performed well as strong company earnings and improved investor confidence supported the market.

The Administrator is also contractually obliged to prepare for review and approval by the Board the annual report, including financial statements intended to give a true and fair view, and the half-yearly financial statements. The Board evaluates and discusses significant accounting and reporting issues as the need arises. From time to time the Board also examines and evaluates the Administrator's financial accounting and reporting routines and monitors and evaluates the external auditors' performance, qualifications and independence.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and recommendations and to ensure that these changes are accurately reflected in the Company's financial statements.

Control Activities

The Administrator maintains control structures to manage the risks over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Administrator include analytical review procedures, reconciliations and automated controls over IT systems.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail, correspondence and meetings, to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Board receives regular presentations and reviews reports from the Depositary, Manager, Investment Managers and Administrator. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Capital Structure

No person has a significant direct or indirect holding of securities in the Company. No person has any special rights of control over the Company's share capital. There are no restrictions on voting rights.

Powers of the Directors

With regard to the appointment and replacement of Directors, the Company is governed by its Articles of Association, Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, the CBI UCITS Regulations and the Listing Rules of the Euronext Dublin as applicable to investment funds. The Articles of Association themselves may be amended by special resolution of the shareholders.

The Board is responsible for managing the business affairs of the Company in accordance with the Articles of Association. The Directors may delegate certain functions to the Administrator and other parties, subject to supervision and direction by the Directors. The Directors have delegated the day-to-day administration of the Company to the Administrator and the investment management and distribution functions to the Investment Managers. None of the Directors is an executive Director.

The Articles of Association provide that the Directors may exercise all the powers of the Company to borrow money, to mortgage or charge its undertaking, property or any part hereof and may delegate these powers to the Investment Managers.

The Directors may, at any time and from time to time, temporarily suspend the calculation of the Net Asset Value of a particular Fund and the issue, repurchase and conversion of Shares in any of the following instances:

(a) during any period (other than ordinary holiday or customary weekend closings) when any market or Recognised Exchange is closed and which is the main market or Recognised Exchange for a significant part of investments of the relevant Fund, or in which trading thereon is restricted or suspended;

(b) during any period when an emergency exists as a result of which disposal by the Company of investments which constitute a substantial portion of the assets of the relevant class is not practically feasible; or it is not possible to transfer monies involved in the acquisition or disposition of investments at normal rates of exchange; or it is not practically feasible for the Directors or their delegate fairly to determine the value of any assets of the relevant Fund;

(c) during any breakdown in the means of communication normally employed in determining the price of any of the investments of the relevant Fund or of current prices on any market or Recognised Exchange;

(d) when for any reason the prices of any investments of the relevant class cannot be reasonably, promptly or accurately ascertained;

(e) during any period when remittance of monies which will or may be involved in the realisation of or in the payment for any of the investments of the relevant class cannot, in the opinion of the Directors, be carried out at normal rates of exchange;

(f) for the purpose of winding up the Company or terminating any Fund; or

(g) if any other reason makes it impossible or impracticable to determine the value of a substantial portion of the investments of the Company or any Fund.

Notice of any such suspension and notice of the termination of any such suspension shall be given immediately to the Central Bank of Ireland and to the relevant stock exchanges and will be communicated to applicants for shares or to shareholders requesting the repurchase of shares at the time of application or filing of the written request for such repurchase. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

Registered shares may be transferred by instrument in writing. The instrument of transfer must be accompanied by a certificate from the transferee that it is not acquiring such shares on behalf of or for the benefit of a US Person. In the case of the death of one or joint shareholders, the survivor or survivors will be the only person or persons recognised by the Administrator as having any title to or interest in the shares registered in the names of such joint shareholders. The Directors may decline to register a transfer if they are aware or reasonably believe the transfer would result in the beneficial ownership of shares by a person in contravention of any restrictions on ownership imposed by the Directors or might result in legal, regulatory, pecuniary, taxation or material administrative disadvantage to the relevant Fund or shareholders generally.

The Directors have the power, under the Memorandum and Articles of Association of the Company, to determine the time and place at which payment for shares must be made. Accordingly, the Directors in exceptional circumstances have discretion to accept subscription monies after the dealing time specified in the Prospectus. In exercising this discretion, the Directors will take into account legal considerations, timing considerations and other relevant considerations.

Review of Business and Future Development

There was no change in the nature of the Company's business during the financial year. The performance review encompasses tracking error and tracking difference disclosures which are key metrics as to how well the Fund has been managed against their benchmark indices. There is a detailed review in the Performance Summary of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

Shareholder Meetings

The Annual General Meeting of the Company will usually be held in Dublin, normally during the month of December or such other date as the Directors may determine. Notice convening the Annual General Meeting in each year at which the audited financial statements of the Company will be presented (together with the Directors' and Auditors' reports of the Company) will be sent to shareholders at their registered addresses not less than 21 clear days before the date fixed for the meeting. Other general meetings may be convened from time to time by the Directors in such manner as provided by Irish law.

Each of the shares entitles the holder to attend and vote at meetings of the Company and of the Fund represented by those shares. Matters may be determined by a meeting of Shareholders on a show of hands unless a poll is requested by any shareholder having the right to vote at the meeting or unless the chairman of the meeting requests a poll. Each shareholder has one vote on a show of hands. Each share gives the holder one vote in relation to any matters relating to the Company which are submitted to shareholders for a vote by poll. No class of shares confers on the holder thereof any preferential or preemptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the shares requires the approval of three-quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be such number of shareholders being two or more persons whose holdings comprise one-third of the shares.

Each of the shares other than Subscriber shares entitles the shareholder to participate equally on a pro-rata basis in the dividends and net assets of the Fund in respect of which the shares have been issued, save in the case of dividends declared prior to becoming a shareholder.

Management shares entitle the shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are seven Directors currently, four of whom are independent of the Investment Managers. The Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014, as amended. The Board meets at least quarterly.

An audit committee has been formed as a sub-committee of the Board. There are no other sub-committees of the Board.

Diversity Report

With respect to diversity, the Company has no employees and the only individuals engaged directly by it are its Directors. When there is a vacancy on the Board, in line with the Company's Diversity Policy, the objective is to ensure that the Board is diversified with an appropriate mix as regards age, gender and educational/professional backgrounds, while achieving compliance by all individuals with regulatory requirements and an overall composition with the requisite experience and skills.

All Board appointments over the reporting period have been in line with the Company's Diversity Policy.

These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.
